Service Club Officer Named

Kenneth L. Boesinger of Inglewood has been named Exchange Club governor for the organization's district 20 which includes Torrance.

As district governor, Boesinger will maintain contact between the Exchange Clubs in his area and the national headquarters. He will make periodic visits on the clubs, informing them of national procedures and policies, and will report on the clubs' plans and programs.

He is a past president of the Exchange Club of Inglewood. National programs and projects which the district governor will assist the local clubs

in performing are: The Book of Golden Deeds Awards to persons contributing to the welfare of their communities; Freedom Shrine (28 historic U.S. documents) presentations to schools and public buildings; National Crime Prevention Week observed each February; Community service activities, youth programs, and the sponsoring of other Exchange service clubs.

Don't be fooled by the calendar. There are only as many days in the year as you make use of. — Charles Richards.

Area Chambers Plan Complaints

In Freight Rate Discrimination

Sufficient time will be granted the Pacific Inland Tariff Bureau to eliminate discriminative freight rates that prevail in Torrance and other Southwest areas before a complaint is filed with the Interstate Commerce Commission, according to the Torrance Chamber of Commerce.

An appeal has been made to the bureau for elimination of the discriminatory freight rates that prevail in the general vicinity south of Artesia

Boulevard, including Torrance, Carson, Wilmington, San Pedro, and Long Beach.

THIS MONTH, area Chambers of Commerce will ask shippers who are affected by the rate to prepare personal complaints against specific common carriers who currently charge the rate. At a recent meeting of chamber representatives, it was agreed that about 14 shippers have submitted sufficient evidence that a joint complaint

will be arranged for filing with the Interstate Commerce Commission.

Last summer Chambers of Commerce in the Southwest areas along with shippers to the Pacific Northwest, appeared before the Pacific Inland Tariff Bureau and made an appeal for elimination of the discriminatory rates.

SINCE THE hearing, communications have been received for bureau representatives advising the chambers that their request was under committee advisement and consideration.

More than six months have passed and a final plea was registered last month with the bureau by the chambers involved. At the recent meeting the chambers generally agreed that each organization would explain the case to its board of directors and request that they go on record supporting a complaint to be filed with the ICC.

Marymount Schedules Concert

Works by Handel, Beethoven, Dvorak and Brahms will be featured when the Marymount College Chamber Music Orchestra presents the first concert of the 1963 season on Monday evening, Jan. 14, on the Palos Verdes Estates campus.

Directed by Sven Reher, nationally known cellist and assistant professor of music at Marymount, the program will also consist of contributions from Heitor Villa Lobos, Paul Creston and Halvorsen.

PARTICIPATING WILL be Ruby Hollis, piano; Nancy Shomler, flute, Sandra Karol and Dianne Plummer, violin, Anna Meyer, viola and Lois Blackburn, cello. Professor Reher will also play.

The complete program will consist of Terzetto in C Major for two violins and viola by Dvorak, Serenade in D for flute, violin and viola by Beethoven, Duo for violin and viola by Villa Lobos and Prelude and Dance for accordion solo by Creston.

ALSO TO be heard will be the Capriccio Brilliant by Mendelssohn, Sarabande for violin and viola by Handel, Halvorsen and the Piano Quintet in F Minor by Brahms.

The concert will begin at 8 p.m. in the auditorium of the Student-Faculty Center, and there will be no admission charge.

PUC Says Users Must Get Savings

The California Public Utilities Commission today announced that it has taken action which ultimately will require all utilities and transportation companies under its jurisdiction to pass on to ratepayers any savings in income tax resulting from the investment tax credits provided for in the Internal Revenue Act of 1962.

George G. Grover, commission president, said the principle is the same as that applied with regard to accelerated depreciation. It establishes accounting procedures designed to assure that any reduction in taxes will flow through to the benefit of utility customers.

NO CALCULATION can be made of the effect of the investment tax credits at this time, Grover said, but several million dollars ultimately may be involved. The amounts accruing to regulated companies may prevent rate increases in future by providing additional earnings, but whether it might result in any rate decreases cannot immediately be determined, Grover said.

The Internal Revenue Act of 1962 provides a three per cent tax credit for utilities and a seven per cent tax credit for other companies, including transportation companies, on property put into service after Jan. 1, 1962, "excluding buildings and their structural components." The tax credit can be taken only on equipment and other property with a life of four years or more.
